To Whom It May Concern:

When I was young I was fortunate to be surrounded by successful people – defined by both professional accomplishments and personal relationships. A common thread that many of them shared was their expression of gratitude and appreciation for the simple things that enhanced the quality of their lifestyle. As unimportant as these principles are to some, I hope to develop these characteristics to help define meaningful success in my own life.

I was first introduced to Clicgear by one of those role models whose lifestyle I wished to emulate. From his example I looked forward to the time I have a Clicgear pushcart of my own. I had been using various makes and models, and eventually tried out his 1.0 - I felt like the world was mine. As my time spent on the course increased, I realized how much I needed one of my own. Over the course of 20+ years I have spent golfing, I wonder how I did it without a Clicgear pushcart. I wanted to take a moment to say thank you, for the extra measure of eminence that Clicgear has added to my lifestyle, both professional and personal.

The Clicgear brand and product design emulates the very impact I hope to have on those I come in contact with – the highest standard of quality and the utmost appreciation for the smallest details. As my family grows and I introduce the game to my children I want them to know what a quality golf company represents, both on and off the course. I have been an avid Clicgear advocate for several years, recommending to some, purchasing as gifts for others. My Clicgear 1.0 has recently seen its final days and I'm excited to make a renewed investment before the end of the season – the 3.5 has really caught my attention! I hope this letter of thanks and appreciation has reached you in good health, and you are able to share my gratitude with those who are responsible for the performance and creative design at Clicgear.

Respectfully,

Kevin S.
